

OnViewcloud.net

OnViewcloud.net Account Creation

A-Series DVR

1) Register

Open your web browser. Input www.onviewcloud.net to enter the login window displayed below:

The screenshot shows the OnViewcloud.net login and registration interface. On the left, there are two login options: "Single User" and "Senior User". The "Single User" section has fields for "Serial Num." and "Device Password", with a "Login" button below. The "Senior User" section has fields for "User" (containing "demo") and "Password", with "Register" and "Forget" links next to the "User" field, and a "Login" button below. A note at the bottom of the login area states "This system support ie8 version above". On the right, there are two QR codes for downloading mobile applications. Below the QR codes, a caption reads: "Scan to download android application(the left side)/ apple application(the right side)".

User Registration:

Please register before attempting to log in for the first time. Follow the proceeding instructions carefully:

Click on the **Register** link on this webpage and fill out the required information.

(See the next page for detailed instructions)

User	Create a user name. You can use an email account if you want.
Password	Choose a password. This will be your log-in password for this account.
Confirm Password	Retype your password to confirm its accuracy.
Name	Choose a descriptive name to call your account. Any name you want. Example: <i>In-N-Out Restaurant DVRs</i> .
Telephone	Optional.
Email	Important: use a valid email address.*
MSN	Leave blank.

Note: Please enter a **valid email address; this is the **ONLY WAY** to recover lost passwords.*

Recovering forgotten passwords:

If you forget your password, please click **Forget** and enter your user name; a link will be sent to your email address on-file. Check your email and click the link. Change your password when prompted. (See image on next page)

Forgot password don't worry!

Please input the correct user name, we'll tell you the email address password!

Please enter your user name

Finish

Congratulations! You've now created an account on OnViewcloud.net and can add your DVRs and NVRs to your account.

2) Add a Device

Make sure your device is already plugged into the network and is online before proceeding.

+ Add - Delete

Group	demo <input style="width: 90%;" type="text"/>	*
Device name	<input style="width: 90%;" type="text"/>	*
Serial number	<input style="width: 90%;" type="text"/>	*
Device user	<input style="width: 90%;" type="text"/>	*
Device password	<input style="width: 90%;" type="password"/>	

- Select the group the device will belong to.
- Give the device a name (any name you want).
Example: Warehouse DVR, Showroom DVR, etc.
- Input the serial number and current user name and password **of the DVR** (not of your onviewcloud.net account).
- Save the changes.

Fields marked with an * are required.

Note: if you change the password on the DVR you must update the password of that DVR on this screen or you will be unable to access it from your OnViewcloud.net account.

You've now created your account and added a device successfully. You can continue adding devices or edit further parameters by reading your DVR's User Manual available on the website.

You can now access all devices added to this account from anywhere in the world. Simply log into your onviewcloud.net account using PCMS or OnView on your smartphone. Enjoy!
